(1) Fixed Type includes basic unit, top and bottom rear connection and Micrologic 2.0X.

(2) Drawout Type includes basic unit, chassis, safety shutter and locking block, top and bottom rear connection and Micrologic 2.0X.

(3) Please use Product Selector Platform to configure circuit breaker with required Micrologic Control Unit and Digital Modules.

(4) For 3-pole ACB with Micrologic 6.0X, it is necessary to add external sensor for earth-fault protection (TCE).

(5) For all ACB with Micrologic 7.0X, it is necessary to add rectangular sensor for earth-leakage protection.

(6) For upgrading digital module in existing MTZ ACB, please consult Schneider Electric (Hong Kong) Limited.

- (1) Block of 4 contacts for CA2-K and CA3-K only.
- (2) For satisfactory protection, a suppressor module must be fitted across the coil of each contactor.
- (3) Clipping on makes the electrical connection. The overall size of the contactor remains unchanged.
- (4) Mounting at the top of the contactor on coil terminals A1 and A2.
- (5) The existing suppression device must be removed before installation of accessories.
- (6) From D09 to D38, DC and low consumption 3-pole contactors are fitted with built-in suppression as standard.

(1) Terminal blocks are supplied with terminals protected against direct finger contact and screws in the open, "ready-to-tighten" position.

(2) The time for which the coil of remote tripping or electrical resetting device LA7D03 or LAD703 can remain energised depends on its rest time: 1s pulse duration with 9s rest time; 5s pulse duration with 30s rest time; 10s pulse duration with 90s rest time. The maximum pulse duration is 20s with a rest time of 300s, while the minimum pulse time is 200ms.

(3) Reference to be completed by adding the code indicating control circuit voltage:

### Harmony<sup>(1)</sup> NFC Multifunction 3-phase Control Relay

#### NFC 三相控制繼電器

The Near Field Communication (NFC) control relay is designed to monitor in 3-phase power networks and upon detection of faults, the relay contacts can be opened or closed with or without a set timing period. NFC control relay provides simplified product selection and inventory management. It monitors 3-phase or 3-phase + neutral networks with 4 indication LEDs that display exact faults occurred during the process.

### Zelio NFC Relay Mobile Application

To use NFC timing/ control relay, an Android phone with NFC feature and Android OS (version 4.4 and above) are required. With this mobile app, accurate parameter settings can be achieved and the 2 relay outputs can be individually configured. The Zelio NFC app can be downloaded in the mobile with one of the following methods:

- Align the mobile phone NFC antenna to the product NFC antenna. This will take you to the Google Play page for downloading the app.
- Go to Google Play and search for "Zelio NFC".
- Scan the below QR code to download the Zelio NFC app.

(1) From 5.5kW to 15kW, select the product with the book control block. The external shape of drives is cubical (see dimension table). The concerned references are ATV320U55N4B, ATV320U75N4B, ATV320D11N4B and ATV320D15N4B.

(2) These values are given for a nominal switching frequency of 4 kHz, for use in continuous operation. The switching frequency is adjustable from 2 to 16 kHz. Above 4 kHz, derate the nominal drive current. The nominal motor current should not exceed this value. See derating curves.

(3) Typical value for a 4-pole motor and a maximum switching frequency of 4 kHz, with no line choke for maximum prospective line Isc (4).

(4) Nominal supply voltage, Min. U1, Max. U2: 200 (U1)...240 V (U2), 380 (U1)...500 V (U2).

(5) Drives supplied with category C2 integrated EMC filter which can be disconnected.

(6) Drives are supplied with an EMC plate for self-assembly.

(7) Connection in compliance with EMC standards:

- ATV320●●●M2B, AT320U04N4B drives are supplied with an EMC plate. This is an integral part of the power terminal and cannot be separated.  
- ATV320U55N4B...D15N4B drives are supplied with an EMC plate for self-assembly.

(1) Please contact Schneider Electric (Hong Kong) Limited for details of VSD offer > 315kW.

These values are given for use in continuous operation with a nominal switching frequency of 2.5 kHz (ATV630D55N4...C31N4).

The switching frequency is adjustable from 2...8 kHz (ATV630D55N4...C31N4).

Above the nominal switching frequency, the drive will automatically reduce it in the event of an excessive temperature rise.

For continuous operation above the nominal switching frequency, nominal drive current should be derated according to the derating curves available at [se.com.hk](http://se.com.hk)

(2) Product supplied as IP00 for mounting in an enclosure. For IP21 / UL type 1 wall mounting, an adaptation kit should be ordered separately.

Please consult Schneider Electric (Hong Kong) Limited for details.

(1) The filters are designed to operate in a switching frequency range between 2 and 8 kHz.

(2) Values given depend on the nominal switching frequency of the drive which is subject to drive rating. The cable lengths are given as examples only and can vary depending on application. They correspond to motors conforming to IEC 6034-25 and NEMA MG1/31.2006.

(3) Nominal filter current.

(4) When using with **ATV650U07N4/N4E...D90N4/N4E** drives, the filter must be mounted in a separate enclosure to maintain IP55 protection during installation.

(1) The filters are designed to operate in a switching frequency range between 4 and 8 kHz.

(2) When using with **ATV650U07N4/N4E...D90N4/N4E** drives, the filter must be mounted in a separate enclosure to maintain IP55 protection during installation.

(3) In normal duty, it is suggested to apply a derating of 1 to the drive nominal power with a minimum switching frequency of 4 kHz. For example: an ATV630C13N4 drive with sinus filter can be used on a 110 kW motor and an ATV630C16N4 drive with sinus filter can be used on a 132 kW motor.

(1) M221 controllers are supplied with:  
- Removable screw terminal blocks for connecting I/O  
- A removable screw terminal block for connecting power supply  
- A button cell backup battery (BR2032)  
- A cable for connecting analog inputs

(2) Each M221 logic controller consists of an embedded USB mini-B programming port.

(3) 1 cartridge for controllers with 16 and 24 I/O and a maximum of 2 cartridges for controllers with 40 I/O, only one of which can be a communication cartridge.
